

```
function SearchBar({ search, setSearch }) {  
  return (  
    <input  
      className="input"  
      placeholder="Search movies..."  
      value={search}  
      onChange={(e) => setSearch(e.target.value)}  
    />  
  );  
}  
  
export default SearchBar;
```
